

Making it Work: GCSE Maths re-sits

A symposium to be held on 8 October 2016 at the University of Gloucestershire

Recent changes to government policy mean that FE colleges must cater for a large number of 16-18 year olds re-sitting their GCSE Mathematics exam. This project, run as a partnership between University of Gloucestershire and Gloucestershire College, aims at identifying, researching and promoting the best practice in the sector.

We have a particular interest in students' experiences of mathematics education and how we - as practitioners - can make learning mathematics an enjoyable, confidence-building experience for the students who may previously have had negative experiences of the subject.

"Making it Work" is run by practitioner-researchers for practitioners and researchers alike. If you have a research interest in the topic, or simply would like to know more, please feel free to contact us using the following contact details:
